

CARDIOVASCULAR & THORACIC INSTRUMENTS

Instruments used to treat the heart, lungs, esophagus, and other organs within the chest.

CARDIOVASCULAR & THORACIC INSTRUMENTS

We provide a range of cardiovascular instruments and thoracic instruments for surgeons that need assistance during cardiovascular and thoracic surgery. A thoracic surgeon will perform operations on the heart, lungs, oesophagus, and other organs in the chest. This includes cardiothoracic surgery, cardiovascular surgery, general thoracic surgeons, and congenital heart surgeons. Our cardiovascular instruments and thoracic instruments include:

- **Atraumatic Clamps** - To help facilitate surgery within the thoracic cavity, including the heart, lungs and chest.
- **Retractors** - To actively separate the edges of a surgical incision or wound in the thoracic area.
- **Rib Shears** - For opening the chest wall during thoracic surgery.
- **Rib Cutters** - For cutting through the ribs prior to lifting off the chest plate.
