

NEUROLOGICAL INSTRUMENTS

Instruments for the treatment of the nervous system, including the brain, the peripheral nerves, the extra-cranial cerebrovascular system, and spine.

NEUROLOGICAL INSTRUMENTS

We provide a range of instruments for those providing neurosurgery and spinal surgery. Our neurosurgery instruments are designed to help assist rehabilitation, diagnosis, prevention and treatment of the central nervous system.

Neurosurgery Instruments include:

- Currettes - Used for precise and delicate microsurgery such as neurosurgery.
- Dissectors - Enable neurosurgeons to perform a minimally invasive discectomy.
- Elevators - Used to lift the galea above the periosteum below the temporalis muscle.
- Rongeurs - Used to open a window in bone, this is often the skull during neurosurgery.

ASPIRE
